Subject: [External] Comment for Docket No. 2023-9-E

To the Public Service Commission members:

It is important to me that our utilities reduce dependence on coal and gas and rapidly increase solar, wind and nuclear. This summer is a difficult one in terms of heat and flooding and ocean temperatures (which affect hurricane strength); utilities in South Carolina need to do their part to reduce fossil fuel consumption.

I understand that Dominion Energy wants to get a Resource Plan through without public comment. Their choices affect the public.

I am a Dominion customer and want a public hearing on Dominion's long-term resource plan.

Sincerely,
Sara Rutledge
Mount Pleasant, SC
